

NOVOTEK *TimeChannels*

A component for iFIX providing Calendar Based Control of Digital signals

The NovotekTimeChannels component gives you unmatched flexibility to handle the task of turning on and off objects according to a schedule. This can, for example, be used for control of door locks, turning on illumination or climate control.

- ◀ Primarily used in building automation for control of e.g. locks, illumination and climate control.
- ◀ Handles up to 999 digital signals.
- ◀ Up to 20 user defined calendars for every year.
- ◀ Supports up to 999 channels holding information on which on/off times to use for the different day-types.
- ◀ Up to 8 day-types.
- ◀ Each day-type has three user definable activation times and three de-activation times.
- ◀ Usable in most branches of industry
- ◀ Distributed Client/Server
- ◀ Start- and stop-time optimisation.
- ◀ Override function to temporarily switch to an alternative channel.
- ◀ Automatic/manual control of an individual signal
