

Pressrelease January 2006

## **Proficy Plant Applications 4.2 is now available**

Proficy™ Plant Applications 4.2 has been released to manufacturing! The latest release of Plant Applications helps customers close the loop between the business and manufacturing. Enhancements and new functionality have been added to align Plant Applications Order Scheduling and Bill of Material functionality with ERP functionality.

In addition, it has enhanced the Key Performance Indicators and Key Business Drivers that are reported by streamlining configuration and adding additional content. The new capabilities in Proficy Plant Applications 4.2 release are listed below. Major functional areas that have been enhanced for this release include:

- Significant Documentation Update
- Portal: Application Connector, Linking Expert
- OEE (Efficiency) Enhancements
- ERP Connectivity and BOM Enhancements
- Manual Order Flow Enhancements
- OPC Array Support (Spec)
- Cross Product / Platform integration
- 200+ Engineering Change Request delivered
